DIES IN ELECTRIC CHAIR FOR KILLING DAUGHTER

Wife's Confession of Unfaithfulness Fails to Save New York Farmer's Life.

DANNEMORA, N. Y., July 31.

Charles L. Green, an Albany county farmer, was electrocuted today at Clinton prison for the murder of his daughter, a girl of fourteen years, on a farm near Scotland, a year ago. The electrocution had been twice stayed by Gov. Dix, because of the husband's peculiar actions.

Green followed them and asked his wife to return home. When she refused he went for a shotgun and, returning, shot his daughter, killing her instantly. Then he fired at his wife, who, although desperately wounded, recovered.

Thinking he had killed them both, Green fled and later shot himself. He was found in a lonely house by the sheriff and, when he was there, had scrawled "good-bye" on an empty cartridge box. His wound was not serious and his conviction followed.

Wife Had Fled Home.

The crime for which Green was put to death was committed July 27, 1910, on the farm of William Vadney, an uncle of Mrs. Green, where she had fled with her little boy, Chester, and daughter, Eva, because of her husband's peculiar actions.

Green followed them and asked his wife to return home. When she refused he went for a shotgun and, returning, shot his daughter, killing her instantly. Then he fired at his wife, who, although desperately wounded, recovered.

Thinking he had killed them both, Green fled and later shot himself. He was found in a lonely house by the sheriff and, when he was there, had scrawled "good-bye" on an empty cartridge box. His wound was not serious and his conviction followed.

Wife Made a Confession.

After Mrs. Green's recovery she made an affidavit that she had been unfaithful to her husband and that this had caused the shooting. Gov. Dix granted a respite and Justice Howard of Troy heard a motion for a new trial. Mrs. Green stated that it was not until a few days before the murder that her infidelity became known to her husband.

In opposing the application the district attorney declared that those facts had been known by both sides during the trial, although they were not brought out. It developed that Green had told his wife that he was going to leave her and to give this information to the witness stand, saying he would rather go to the electric chair than to have it known.

Efforts to have a conviction against him to examine into Green's sanity were without avail.

The unsteady hand of the coffee drinker soon regains its old-time poise after a change to

AIDING IN BIG FLY FIGHT.

The Star's FLY-LESS CITY Campaign

Caught by Age Street.

660. 660.

GEORGE P. KILLIAN, Who is giving the boxes for the catches of the fly crusaders.

HELP TO OFFICIALS

Star's Fly Crusade Inspires Health Department Action.

"SWAT THE MAN" NOW

To Push Campaign Against Persons Responsible for Breeding Places

RECORD OF CHILDREN'S FIGHT

Card Index Being Kept to Locate Spots in City Where Pests Abound.

A big campaign for municipal sanitation, intended to follow the results of The Star's fly-extirminating crusade, is to be undertaken by the District health department.

This announcement was made today by Health Officer Woodward. With The Star's fight on the principal finished, the department is going after the accessories in the crime of disease-spreading.

"Swat the man that feeds the fly" is to be the slogan of the health officials.

"The Star's contest has enabled the health department to come into possession of a vast amount of valuable information," said Dr. Woodward. "It has developed in the daily slaughter of flies where these insects seem to infest the city in the greatest numbers. Nothing could have given us a better line on the breeding and feeding places of the pest. The department will utilize this information and will go after the persons who have helped the insect to exist and be a constant source of danger to the health of the city."

Great Benefits to Come.

Declaring that the "swat the fly" campaign has been of incalculable benefit to Washingtonians already, but that the information it has developed will be of even greater advantage later, Dr. Woodward said that the health department hopes to accomplish results that will attract the attention of the whole country.

While not intimating what will be the method of attack on the persons who have enabled the fly to thrive, the health officer said that the department is finding out where to direct the attack, which means the battle more than the pest.

According to Dr. Woodward, the contest has given the health officials a panoramic view of the city with respect to the manner in which it is fly-infested. The killing of more insects in one section than another is taken to mean that the particular section conditions make it easier for the fly to exist.

The department intends to find out what these conditions are and who is responsible for them. It is going to resort to the law wherever necessary in its efforts to have these conditions changed.

Careful Record Being Kept.

The decision of the department to record in a card index system the killings of the children entered in The Star's contest was made for no other purpose, it was stated today, than that the department might ascertain what parts of the city are most afflicted with flies.

When The Star's campaign has finished, it is the plan of the department to make a careful study of the sections and make a careful study of the sections they tell. Inspectors will be sent out to make preliminary reports. The department intends to go after the accessories with as much determination as the children have gone after the fly.

The second week of The Star's two-week campaign opened with a rush at noon from the receiving offices, many new children entered the contest. The supply of boxes at all the stations ran more than ten miles. By the time the contest is over, it is estimated that the number of flies probably would exceed half a million. It is expected that the count will show the total slaughter to date to be in the neighborhood of 3,000,000.

Some interesting figures on what the crusade has accomplished so far have been compiled by Dr. Murray.

With 2,000,000 insects destroyed, he estimates that by placing them in a row they would make a line extending more than ten miles. By the time the contest is over, it is estimated that the number of flies probably would exceed half a million. It is expected that the count will show the total slaughter to date to be in the neighborhood of 3,000,000.

lines to one of the girl leaders in the contest for The Star's prizes:

TO CORA BRISCOE.

O little maid! O pretty maid! Thou great and good fly-swatter! Please haul my mail and bring me bliss. Oh, come to me-I totter!

A million flies all over me now! Pray bring my swatter blither. And swat in summer and in fall, In fair and rainy weather. And swat fly day and night, And swat as thou art able. Ten thousand flies my head have bite, For I live in a fly house!

CUMBERLAND JOINS CRUSADE.

"Swat-the-Fly" Movement Hits the Maryland City.

Special Dispatch to The Star.

CUMBERLAND, Md., July 31.—The Cumberland Civic Club, composed of prominent women of the city, at a meeting at Emmanuel parish house, approved the "swat-the-fly" crusade and decided to pay 10 cents a pint for all flies not caught on fly paper brought to the club.

The Civic Club appointed a committee to wait on the local newspapers and ask that the publication of stories of immoral crimes be minimized. The publication of such articles, it was declared, acts adversely upon the minds of the young and the old, and is a source of other similar crimes and depravities.

While council has adjourned for the day, it was understood that several called meetings may be held between now and the time for reconvening to consider several matters pertaining to street improvements, it is said.

The lower branch of council may be called together by the president of that body on the application of three or more members.

After a four-year absence from home Patrick Roddy, thirty years old, of Washington, boarded a freight train in Richmond Saturday night and started for his goal.

Just as the train neared Cameron run bridge, three miles west of here, Roddy made a jump from the rapidly moving train, evidently laboring under the impression that he was entering Washington and also fearing detection and arrest for trespassing. As he jumped he fell beneath the wheels of the train and his right arm was almost completely severed. He also received internal injuries.

The train was stopped and he was picked up and brought to this city about 2 o'clock yesterday morning and taken to the Alexandria Hospital, where his arm was amputated by Dr. W. M. Smith. Roddy died at 6:30 o'clock. His body was taken to Wheatley's undertaking establishment and a funeral was held by relatives in Washington and taken to that city for burial.

Leaves Hospital Too Soon.

Tony Antoinette, also known as Bernard, an Italian section hand employed at the Potomac railroad yard, Alexandria county, who recently had several ribs broken as a result of being struck by a passenger train, took French leave from the Alexandria Hospital yesterday afternoon, although he was told not to leave. Antoinette believed he was sufficiently well to go home. Before he had gone three squares he collapsed as a result of weakness and was severely assisted back to the hospital, where he is now being treated.

Believing it best policy to tell the time the city dog wagon will again be placed on the streets, the police this morning refused to disclose just when it will again start on its crusade. It will, however, be in the near future.

A girl about 15 years old fell overboard on the Duke street wharf at 7 o'clock last night, and was rescued by Norman Davis, who happened to be on the wharf. Davis plunged into the river and brought the girl ashore, after which she was taken to her home.

One of the most serious cases of disorderly conduct, forfeited \$5 colliers, disorderly conduct and fighting, fined \$5 each; James Miller, colored, disorderly and fighting, forfeited \$5 colliers; Isiah Scott, colored, same of fence, acquitted.

Susie E. Weston, who lived at 715 Jefferson street, died Saturday night at an advanced age, after a long illness. Her funeral will take place at 3 o'clock this afternoon. Services will be conducted by Rev. L. F. Kelly, and burial will be in St. Mary's cemetery.

Elizabeth, 7 Harmon street, daughter of Mr. and Mrs. Edward J. Harmon, died last night at the home of her parents, 425 South Fairfax street.

Militiamen Back From Camp.

After a week's strenuous camp work at Culpeper, Va., forty members of the Alexandria Light Infantry returned home at 5 o'clock yesterday morning.

The presentation book of the corporation court issued 44 marriage licenses, of which 34 were to white and 10 to colored persons. He also recorded 41 deaths.

Kathleen Sullivan has returned from a visit to Philadelphia, Camden, N. J., and Atlantic City.

The Retail Merchants' Association will at a meeting tonight consider a proposed change in the by-laws of that organization.
